# SIERRA TELEVISION FAQ

**Q: What do I need to get Sierra Television service?**

A: Getting Sierra Television is really easy. Here's what you need:

1. A Sierra Tel DSL line
2. A current Sierra Tel DSL modem
3. A Set-top device from Sierra Tel
4. A standard definition or high definition TV

**Q: Can I watch High Definition (HD) channels?**

A: Basic and Standard DSL customers qualify for Standard Definition (SD) channels only. Premium DSL customers and customers with the "On-Net Turbo Boost" option will have access to both HD and SD channel programming.

**Q: Can I use a DVR (Digital Video Recorder)?**

A: Premium DSL subscribers and subscribers with the On-Net Turbo Boost option can record and watch shows with a built-in DVR on the Amino 540 set-top device.

| DSL Plans                  | DVR | HD  | # of TV's | Max # Streams |
|----------------------------|-----|-----|-----------|---------------|
| Basic or Standard DSL      | No  | No  | 2         | 2 SD          |
| Premium DSL or Turbo Boost | Yes | Yes | 2         | 2 HD or 4 SD  |

**Q: Will watching TV affect my Internet speed?**

A: Watching and recording shows, or leaving your set-top device on may impact your Internet experience. For best Internet results, put your set-top device in Standby mode while your television is not in use. Press the STB button on the remote. All the lights will go out, and the device will appear to be off. Note that your DVR will still be active and could still affect Internet speed.

*Applicable CA sales tax and public, educational, and government surcharges apply.*
